

Liposuction

- Invasive – small incisions made in the skin
- Local anesthesia needed
- Pain meds might be necessary
- Removes 100% unwanted fat from an area within one procedure
- See the results immediately
- 2-4 days of downtime
- Dramatic results

CoolSculpting®

- Non-Surgical - no incisions made on body
- No anesthesia needed
- No pain meds necessary
- Removes about 20% fat from an area so several tx could be necessary
- Takes months to see the end result
- No downtime with minimal discomfort
- Less dramatic results
